

Clarity[®]

Integrated Payroll, Human Resource and Time & Attendance Software

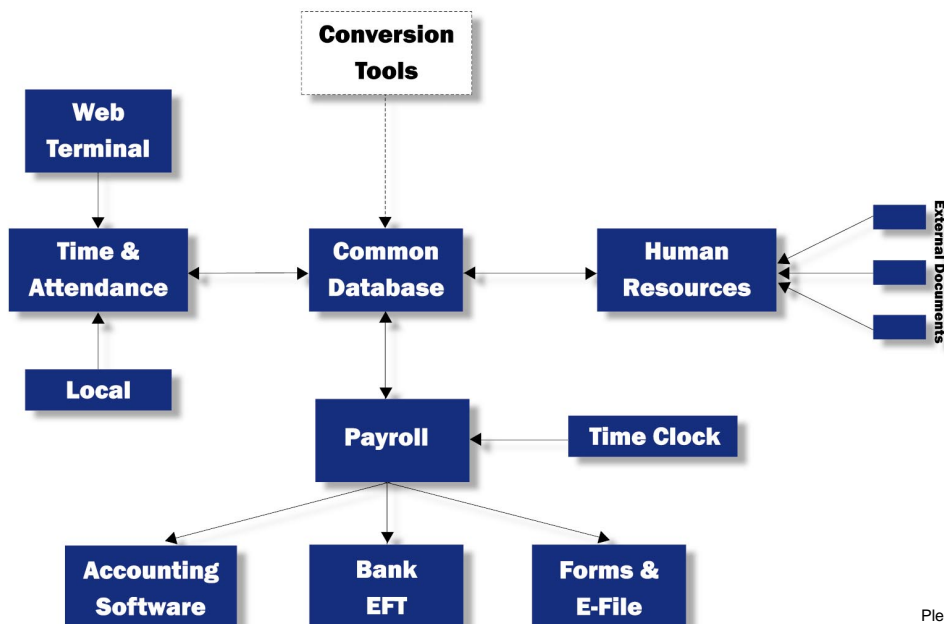

Clarity is a comprehensive suite of Payroll, Human Resource and Time & Attendance modules, designed for Canada and the US. Each module can work independently or as an integrated system sharing a common database.

Clarity is designed for medium to large sized organizations looking to implement a very cost-effective, easy to use solution, with a short implementation cycle. Clarity, with its emailing and Internet capabilities, easily handles the requirements of multi-location organizations.

Clarity uses MS Windows[®] client server technology and an MS SQL[®] database for improved security, performance and reliability. Clarity is scalable, modular, has multi-user capabilities, and can grow with your business. By using a common database, Clarity eliminates redundant data entry and simplifies the task of keeping your data current.

Clarity offers a versatile, user configurable system with rich, intuitive features such as import utilities, mass update and a built-in Report Writer. Clarity's integration and interface capabilities improve productivity by allowing data transfers with minimal intervention, not only within your Clarity modules, but also with your accounting system, Time clocks, banks, HRDC and CRA (Please see Clarity Integration Chart below). Clarity also has easy-to-use conversion tools to facilitate migration from existing systems.

Clarity's full range of services include remote and on-site support, software updates, customization, training, data conversion / migration and project management.

Please see over...

Clarity encompasses three distinct modules:

Clarity Payroll

- Unlimited number of user defined earnings, benefits, deductions, taxes, accruals and payroll taxes
- Direct Deposit (EFT)
- Cost Allocation and Job Costing functionality
